#### 4. References to Capital Requirements Regulation (CRR) 129(7)

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 648/2012. It should be noted, however, that

whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 648/2012 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

## C. Harmonised Transparency Template - Glossary

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	[Insert Definition Below]
HG.1.1	<b>OC Calculation: Actual</b>	<p><b>Nominal Overcollateralisation "OC" ratio</b></p> <p>The OC ratio as established to comply with contractual and rating agencies minimum requirements is a nominal rate calculated by dividing the nominal outstanding amount of eligible assets (substitute assets and accrued interests excluded) by the nominal amount of covered bonds (after taking into account if any interest rate or currency swaps and accrued interests excluded).</p> <p>The over-collateralization is calculated as the ratio between the total outstanding balance of pledged home loans (excluding accrued interests) and the nominal of covered bonds. HSBC SFH holds no interest rate swap at reporting date.</p> <p>The legislation requires that the calculation of the legal coverage ratio be audited semi-annually within a period of three months following the calculation date. As a consequence, the current ratio is provisionnal / unaudited when the report is published. The last audited ratio is based on 31st December 2015 cut-off.</p> <p>Rating agencies : Minimum OC The highest minimum OC requirement to maintain the highest rating is at 11.2% based on the last published performance / rating reviews.</p>
HG.1.2	<b>OC Calculation: Legal minimum</b>	<p><b>Legal "Coverage ratio"</b></p> <p>This ratio is calculated by dividing the total assets amount (including accrued interests, substitute assets and other assets as prepayments and net accrued incomes on derivatives) by the amount of privileged debts accrued interests included (covered bonds, sums due on derivatives and collateral management fees). When the eligible assets are transferred into the cover pool using guaranteed loans, the amount of the guaranteed loans in the assets amount is replaced by the amount of the eligible assets pledged as collateral.</p> <p>Following amendments to the French covered bond legal framework for sociétés de crédit foncier (SCF) and sociétés de financement de l'habitat (SFH) that came into force on 28 May 2014 (published in JO n°0123 of 28 May 2014), a cap on intragroup exposure has been set at 25% of non-privileged resources and the legal minimum collateralisation raised to 105%, from 102%, on a nominal basis.</p> <p>The legislation requires that a legal coverage ratio is calculated a posteriori on the basis of the audited accounting figures twice a year : as of December 31st and June 30th and on unaudited accounting figures as of March 31st and September 30th. These legal ratios are audited and available within a period of three months following the calculation reference date. The last audited ratio is provided as an additional information. As a consequence, the current ratio, calculated on a quarterly basis, is provisionnal / unaudited when the report is published and is based on forecast amounts as of the end of each quarter, calculated in the frame of the approval of the funding programme of the issuer.</p>
HG.1.3	<b>OC Calculation: Committed</b>	<p>The "Committed" OC is superior to the minimum Reglementary and Legal OC Ratio, of 108,10% in order to reassure the Rating Agencies.</p>
HG.1.4	<b>Interest Rate Types</b>	<p>Interest Rate Types in the cover-pool are mainly fixed interest rates, and also floating interest rates. Floating include loans with interest rate indexed on Euribor 6M and Euribor 1 year.</p> <p>Interest Rate Types of the Covered Bonds of HSBC SFH are only Fixed coupon</p>

HG.1.5	Maturity Buckets of Cover assets [i.e. how is the contractual and/or expected maturity defined? What assumptions eg, in terms of prepayments? etc.]	<p><b>Contractual maturities :</b></p> <p>Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. Regarding covered bonds and substitute assets, contractual maturity is calculated according to the legal final maturity.</p> <p><b>Expected maturities :</b></p> <p>Expected WAL and maturities of the cover pool assets are calculated assuming a percentage of prepayment rate (PPR) equal to the PPR calculated by ALCM internal IRBB model, as per national rules. The substitute assets being actually composed of cash and term deposits to financial institutions, their expected maturity is assumed to be equal to their contractual one.</p>
HG.1.6	Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]	<p>Maturity structure is Hard Bullet for Covered Bonds issued up to 2015. Maturity structure has been Soft Bullet for Covered Bonds insurances since 2015.</p> <p>Expected WAL and maturities of the cover pool assets are calculated assuming no maturity extension for soft bullet series, as per local regulatory guidelines.</p>
HG.1.7	LTVs: Definition	<p><b>Unindexed current LTV</b></p> <p>Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.</p> <p><b>Indexed current LTV</b></p> <p>Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology.</p>

#### Covered bond issuer ratings

The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of referring to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases. If no "CB issuer rating" has been granted to the CB issuer, "NA" is indicated.

#### Core Tier 1 ratio (%)

Core Tier 1 is the Common Equity Tier 1 ratio - CET1 calculated for Bale 2,5

#### Covered bond issuer

#### Covered bonds and cover pool

##### Guaranteed loans or mortgage promissory notes :

The eligible assets, is mainly guaranteed by Credit Logement, are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework). The outstanding amount of the eligible assets pledged as collateral of the loans are indicated instead of the amount of the guaranteed loans. The nominal outstanding amount of the eligible assets is booked in Off-Balance Sheet as guarantee received.

##### Substitute assets :

Are reported the amount of substitute assets as defined by the French Law (Articles L515-17 and R515-7 of Code Monétaire et Financier). For SFH the substitute assets are composed of cash and deposits to its parent company. The outstanding amount is booked in Assets - Balance Sheet as amounts due from credit institution. These substitute assets are included in the calculation of the legal coverage ratio but not taken into account in the nominal rating agencies overcollateralisation ratio.

##### Accounting assets not included in the cover pool :

Are not included in the cover pool the guaranteed loans (replaced by the eligible assets pledged as collateral) and the prepayments and accrued income on derivatives.

##### Asset backed securities :

If eligible asset backed securities are included in the cover pool, the explanations to the reporting should specify whether the information is provided using a look through approach (i.e. underlying assets) or if the outstanding amount of ABS securities held is indicated.

##### "Of which assets eligible to CB repo-operations" :

The outstanding amount of eligible assets including replacement assets shall be filled in. If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans. The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the ECB in February 2012 and presently in use with the French NCB.

## FRENCH NATIONAL COVERED BOND LABEL REPORTING TEMPLATE

### unless detailed otherwise

all amounts in EUR millions (without decimals)

percentages (%) with 2 decimals

time periods in months (with 1 decimal)

### Group level information, senior unsecured ratings and covered bond issuer overview

1.2 Ratings of the parent company of the group in which the CB issuer is consolidated.

#### 1.3 Covered bond issuer ratings

The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds.

However, instead of referring to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases.

If no "CB issuer rating" has been granted to the CB issuer, "NA" should be indicated.

#### 1.4 Core tier 1 ratio (%)

D.

#### 2.2 Covered bonds and cover pool

##### Guaranteed loans or mortgage promissory notes :

If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

Asset backed securities :

If eligible asset backed securities are included in the cover pool, the explanations to the reporting should specify whether the information is provided using a look through approach (i.e. underlying assets) or if the outstanding amount of ABS securities held is indicated.

"Of which eligible to central bank repo-operations" :

The outstanding amount of eligible assets including replacement assets shall be filled in.

If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the ECB in February 2012 and presently in use with the Banque de France

### 2.3 **Overcollateralisation ratios**

Each issuer shall explain calculation methodology for each OC ratio :

- formulas
- all amounts shall be indicated after taking into account the cover pool's interest rate or currency swaps.
- accrued interest included or excluded ?

The legislation requires that the calculation of the legal coverage ratio be audited semi-annually within a period of three months following the calculation date. As a consequence, the current ratio is provisionnal / unaudited when the report is published. The last audited ratio is provided as an additional information.

Rating agencies : Minimum OC

Issuers shall disclose the highest minimum OC requirement.

### 3 **ALM**

#### Contractual maturities :

Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. For pass through ABS, this assumption is applied to the underlying assets to determine the contractual maturity of the ABS (i.e. contractual maturity is not calculated according to the legal final maturity of the securities).

#### Expected maturities :

The assumptions underlying the calculation of the expected WAL and expected maturity breakdown shall be disclosed for each element of the cover pool including substitute assets. Some information should be provided to explain the prepayment assumptions on assets and liabilities. For substitute assets, it should be explained if these assumptions include asset sales or repo.

### 3.5 **Liquid assets**

#### Outstanding

The nominal value of liquid assets shall be reported.

#### Liquidity support

Provide details on the nature of liquidity support.

### 3.6 **Substitution assets**

Details of the information provided shall be given in the case of split ratings.

## Residential cover pool data

- 4 Explain for each table which information is included or not included (e.g. external RMBS assets excluded)

The assets backing guaranteed loans (collateral directive framework), mortgage promissory notes and internal ABS shall be disclosed using a look through approach in each table.

### 4.2, 4.3 **Geographical distribution / regional breakdown**

The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of guaranteed loans. List can be extended by individual issuers where applicable

### 4.4 **Unindexed current LTV**

Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.

### 4.5 **Indexed current LTV**

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology. Details of the indexation methodology shall be provided.

### 4.6 **Mortgages and guarantees**

Provide a breakdown by guarantee regime in the case of state guarantees

### 4.10 **Interest rate type**

*"Floating" includes loans with with interest rate reset periods exceeding one year (e.g. loan indexed on CMS 5Y with an interest rate reset every five years)*

*"Mixed" shall be used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initial fixed rate switching to floating).*
